This anthology epitomizes the strengths of the new history of slavery... an emphasis on the actual experience of enslavement and on enslaved peoples as active agents with their own distinct voices.”—Steven Mintz

The collected essays in Children in Slavery through the Ages fundamentally reconstruct our understanding of enslavement by exploring the often-ignored role of children in slavery and rejecting the tendency to narrowly equate slavery with the forced labor of adult males. The volume’s historical angle highlights many implications of child slavery by examining the variety of children’s roles— as manual laborers and domestic servants to court entertainers and eunuchs—and the worldwide regions in which the child slave trade existed.

The Untried Life
The Twenty-Ninth Ohio Volunteer
Infantry in the Civil War

“James Fritsch has written more than simply a
regimental history of the 29th Ohio Infantry. Through his skill as a writer and researcher he
breathes life into these young men from Ohio and we feel their hopes and joys, fear and
suffering, through four years of war as if we were one of them. This is history at
its best.” —D. Scott Hartwig, Gettysburg, Pennsylvania

“The Untried Life provides a view of the Civil
War from the soldier on the ground. Using
letters, diaries, and newspaper accounts, the
book offers an unfiltered view of the challenges,
hardsips, and personal sacrifices the soldiers
faced and confirms the major role Ohio played
in the Civil War. The book is a must read for

Mikołaj Stanisław Kunicki

**Between the Brown and the Red**
Nationalism, Catholicism, and Communism in Twentieth-Century Poland

In this study of the relationship of nationalism, communism, authoritarianism, and religion in twentieth-century Poland, Mikołaj Kunicki shows how the country’s communist rulers tried to adapt communism to local traditions, particularly ethnocentric nationalism and Catholicism. Focusing on the political career of Bolesław Pasecki, a Polish nationalist politician who started his journey as a fascist before the war and ended it as a procommunist activist, Kunicki demonstrates that Polish Communists reinforced the ethnocentric self-definition of Polishness and prolonged the existence of the nationalist Right.

Research in environmental justice reveals that low-income and minority neighborhoods in our nation’s cities are often the preferred sites for landfills, power plants, and polluting factories. Those who live in these sacrifice zones are forced to shoulder the burden of harmful environmental effects so that others can prosper. Mountains of Injustice broadens the discussion from the city to the country by focusing on the legacy of disproportionate environmental health impacts on communities in the Appalachian region.

America’s Romance with the English Garden
The 1890s saw a revolution in advertising. Cheap paper, faster printing, rural delivery, railroad shipping, and the new technology of chromolithography combined to pave the way for the first modern catalogs. The most prominent of these were seed and nursery catalogs with beautiful pictures of middle-class homes surrounded by sprawling lawns, lush plants, and the latest garden accessories—the quintessential English-style garden. America’s Romance with the English Garden is the story of tastemakers and homemakers, of savvy businessmen and a growing American middle class eager to buy their products.

Invisible Agents
Spirits in a Central African History

“Despite the enormous richness of the literature on the history of religion in Africa, I can think of no other book which brings the insights of that literature to bear so directly and convincingly to the interpretation of modern political history…. This is a great book.”—Meghan Vaughan, University of Cambridge

Invisible Agents shows how personal and deeply felt spiritual beliefs can inspire social movements and influence historical change. Conventional historiography concentrates on the secular, materialist, or moral sources of political agency. Instead, David M. Gordon argues, when people perceive spirits as exerting power in the visible world, these beliefs form the basis for individual and collective actions. Focusing on the history of the south-central African country of Zambia during the nineteenth and twentieth centuries, his analysis invites reflection on political and religious realms of action in other parts of the world, and complicates the post-Enlightenment divide of sacred and profane.

Trafficking in Slavery’s Wake
Law and the Experience of Women and Children in Africa

“Each of the chapters in Trafficking in Slavery’s Wake could stand as a solo article. However, the beauty of the collection is that the pieces say much more when grouped than they would as stand-alones. Patterns emerge. Continuities and discontinuities over time become apparent. Moreover, the contributors have clearly challenged each other to think in new ways.”—Walter Hawthorne, author of From Africa to Brazil: Culture, Identity, and an Atlantic Slave Trade, 1600–1830

Human trafficking is rapidly emerging as a core human rights issue for the twenty-first century. Trafficking in Slavery’s Wake is excellent reading for the researching, combating, and prosecuting of trafficking in women and children.

“For several decades, scholars have effectively mined trial transcripts and other legal sources for innovative perspectives in social history. How a Continent Changed the World’s Game

“Alegi has placed African soccer on firm historiographical footing, while also popularizing a subject about which little was previously known beyond Africa’s borders.” — African Studies Review

“Alegi creatively and effectively uses soccer to tell the story of European domination and exploitation of Africa. Yet, he also shows us how Africans came to embrace the game imposed on them, and made it something distinctly African.” — International Journal of African Historical Studies

“Alegi’s concise and ingenious book is a timely reminder about the impact African players have had on global football and an affirmation of Africa’s mounting stature as a football powerhouse…. Alegi writes in a language that is accessible to non-specialists and casual readers…. Instructors teaching undergraduate courses about global sports or sports in Africa could assign the book or selected chapters to students, who most likely will appreciate the material for its informative strength, brevity, and lucidity.” — African Studies Quarterly

South Africa’s Struggle for Human Rights

The human rights movement in South Africa’s transition to a postapartheid democracy has been widely celebrated as a triumph for global human rights. It was a key aspect of the political transition which brought majority rule and democracy to South Africa. The country’s new constitution, its Truth and Reconciliation Commission, and the moral authority of Nelson Mandela stand as exemplary proof of this achievement. Yet, less than a generation after the achievement of freedom, the status of human rights and constitutionalism in South Africa is uncertain.

San Rock Art
San rock paintings, scattered over the range of southern Africa, are considered by many to be the very earliest examples of representational art. There are as many as 15,000 known rock art sites, created over the course of thousands of years up until the nineteenth century. There are possibly just as many still awaiting discovery. Taking as his starting point the magnificent Linton panel in the Iziko-South African Museum in Cape Town, J.D. Lewis-Williams

African Intellectuals and Decolonization
Decades after independence for most African states, the struggle for decolonization is still incomplete, as demonstrated by the fact that Africa remains associated in many Western minds with chaos, illness, and disorder. African Intellectuals and Decolonization outlines ways in which intellectual practice can serve to de-link Africa from its global representation as a debased, subordinated, deviant, and inferior entity.
